

# HOW TO DEEPLINK

To deeplink to a specific sport, you need to open the HTML5 betting client and follow these steps (Football will be used as an example):

1. Navigate to Football on the client located on the left of the page

2. You will end up on the following page for football

3. The browser URL will now contain the information you will need for deeplinking - 'betting#filter/football'. Remove the #filter part and you will now have a search engine friendly URL.

4. This can be placed into a tracked URL for use by affiliates or into a URL for other channels such as Social or PPC \*\*\*Please replace the # with %2523. 'betting#filter/football' would become 'betting%2523filter/football'
